

# JAYESH VERMA

📍 Pune, India

☎ 9552589634

Email : [jayeshverma1912@gmail.com](mailto:jayeshverma1912@gmail.com)

Portfolio : <https://portfolio-xplorer-jv.vercel.app/>

---

## PROFILE

Java-focused developer with hands-on experience in building real-time systems and backend applications using JDBC, Servlets, and MySQL. Developed scalable solutions including RFID-based attendance systems and IoT applications. Strong understanding of system design, database management, and problem-solving with a focus on delivering efficient and reliable software solutions.

---

## EXPERIENCE

### IoT Developer Intern (Media Urbana)

Developed IoT-based real-time systems using microcontrollers and HTTP protocols

Implemented device communication and live data transfer to server systems

Worked on integrating hardware with backend systems for real-time monitoring

### Arduino Project Developer / Intern Eagle Foundation (2022 – 2024)

- Built multiple real-world IoT applications using Arduino and sensors
  - Contributed to development of organization's official website
  - Collaborated on embedded system projects under mentorship
- 

## PROJECTS

### Multi-Mode Smart Attendance System

- Built RFID-based attendance system supporting School, College, and Office modes
- Implemented real-time data transfer using HTTP to server and Google Sheets
- Designed modular system for scalability and multiple use cases

### Smart Agriculture Management

- Automated irrigation using soil moisture sensor & Blynk IoT
- Real-time monitoring and control of water pump

### Smart Home Automation

- Controlled appliances using relay module & internet
- Remote switching of devices

### Driver Anti-Sleep Detection System

- Detects eye closure and alerts driver using buzzer

### Cafe Management System (Java)

- Built desktop application using Java Swing and JDBC
- Implemented CRUD operations and database connectivity
- Designed for future scalability with Servlet-based backend

### 3D Portfolio (Three.js)

- Developed interactive 3D portfolio using Three.js for enhanced UI/UX
- Showcased projects with dynamic animations and modern design

### Loan Prediction App

- Developed a loan prediction model using **Python, Pandas, NumPy, and Scikit-learn**
- Implemented **Logistic Regression** for binary classification (Approved/Rejected)
- Performed data preprocessing including missing value handling and categorical encoding
- Achieved ~82% accuracy using evaluation metrics like confusion matrix and classification report

## SKILLS

- **Languages:** Java, Python, C++, PHP
- **Web:** HTML, CSS, JavaScript
- **Database:** MySQL, DBMS
- **Technologies:** Arduino, IoT, RFID
- **Concepts:** DBMS, Servlets, System Design

## DECLARATION

I hereby declare that the above information is true to the best of my knowledge.

---

## EDUCATION

### **Master of Computer Applications (MCA)**

Modern College of Engineering, Pune | 2024 – 2026

### **Bachelor of Computer Applications (BCA)**

St. Aloysius College | 2021 – 2024

### **12th (HSC)**

Suryadatta Group of Institutes | 2020 – 2021

### **10th (2018)**

Modern English High School | 2018 – 2019

---

## INTERESTS

- Programming
- Photography
- Music

---

## REFERENCES

**Mr.Vivek Singh(Eagle Foundation,Owner)**

**Mr.Aman Anand (Media Urbana)**

**Mr.Joy khujur (Media Urbana)**

---

## ADDITIONAL INFORMATION

- Strong problem-solving and analytical thinking
  - Ability to work on both hardware and software systems
  - Quick learner with focus on practical implementation
-
